# NIST Cybersecurity Framework Workshop

National Institute of Standards and Technology (NIST) Cybersceurity Framework (CSF) review with the customer to analyze organizational alignment to these standards. The NIST Cybersecurity framework provides a comprehensive approach to protecting critical infrastructure using standards and guidelines. This framework emphasizes a prioritized, flexable, repeatable, and cost-effective approach for organizations to manage cybersecurity-related risk. This is a best practice review of your people, process and technology controls for cybersecurity.

Highlights

- Identify security standards and guidelines applicable across sectors of critical infrastructure
- Provide a prioritized, flexible, repeatable, performance-based, and cost effective approach
- Help owners and operators of critical infrastructure identify, access, and manage cyber risk
- Enable technical innovation and account for organizational differences
- Provide guidance that is technology neutral and enables critical infrastructure sectors to benefit from a competitive market for products and services
- Include guidance for measuring the performance of implementing the Cybersecurity Framework
- Identify areas for improvement that should be addressed through future collaboration with particular sectors and standards-developing organizations

More Information

If you are interested in the NIST Workshop, please contact your Sentinel Account Manager. If you do not have a Sentinel Account Manager, feel free to contact us and we will ensure that you have everything you need.
